What does the **RGS standard** look like in DT?

Year group 8: Shibori

Task: Learn the art of shibori, design and make a successful bag for life.

I work as part of a team, consulting others to check quality and function throughout the making process.

I am able to select tools and equipment with knowledge of what will be appropriate to produce a successful outcome.

My final outcome shows good level of making / modeling / finishing skills.
The product mostly meets the specification and users' requirements.

I can write my own specification.

I make reference to appropriate materials and techniques.
